

Birchcliff Energy Ltd. is currently seeking to fill the following position:

Job Title: Engineering Technologist

Location: Calgary, Alberta

Reports to: Manager, Exploitation

Purpose:

The successful applicant will provide technical support for Engineers and Geologists in their workings in and around our properties in the Peace River Arch Area of Alberta.

More specifically, the employee will be responsible for conducting field development studies, waterflood optimization projects, voidage replacement monitoring, well completion reviews and the collection and coordination of reserves data. The ideal candidate for this position is technically competent and eager for career development.

Required Knowledge, Skills & Abilities:

- Must have 5-10 years experience in the oil and gas industry.
- Petroleum Engineering diploma from NAIT , SAIT or equivalent
- Certification (CET) as an engineering technologist would be beneficial
- Highly developed computer skills required
- Confidence with software such as Accumap, PVR, Fekete, AFE Navigator, Value Navigator, Microsoft Office
- Team player who enjoys working in a smaller company environment
- Enthusiastic individual with good communication and interpersonal skills

We provide a competitive salary and benefit package amongst a dynamic and inviting work environment.

Qualified Applicants are asked to forward their resume in confidence, by **May15, 2008** as described below:
