

### **About us:**

Birchcliff Energy Ltd. is an intermediate oil and natural gas company based in Calgary, Alberta that is engaged in the business of exploring for, developing and producing natural gas and liquids. All of Birchcliff's assets are located in Alberta, where it is focused on the Montney/Doig Resource Play. Birchcliff's vision is to be an industry-leading producer of profitable and sustainable natural gas and liquids, with the objective of increasing shareholder value over the long-term. Birchcliff has a strong record of success, built on its core belief that outstanding people, combined with a great corporate culture, creates a winning environment. We are seeking a highly motivated and dedicated student to join our team for a valuable learning experience.

As a Geoscience Technician Summer Student, you will have the opportunity to work closely with our Geoscience Technical Data Integration & Analytics team. This role will provide you with hands-on experience and exposure to various aspects of Geology in the oil and gas industry. You will play a vital role in assisting with stream lining data and day to day workflows efficiency. As a heavily integrated technical team, we advance our understanding in a multidisciplinary environment using a continuous improvement framework.

The term of the position is for **4 months**, with an anticipated start date in **May 2025**.

### **Key Responsibilities:**

- Work with team to streamline key datasets into various interpretation software.
- Learn to operate software used in the oil and gas industry.
- Review all datasets loaded in GeoGraphix, Petrel and other software as assigned.
- Catalogue and archive public datasets for use in house (Reservoir Evaluation, Productivity, Geologic and other studies).
- Organize, link and clean up maps, filters, layers, spreadsheets, well lists, etc.
- Provide project updates to the team including a final project presentation.

### **Education, Skills & Abilities:**

- Current enrollment in a Technical Bachelor's Degree or Diploma program.
- Hands on MS Office knowledge is required.
- Previous experience with Spotfire, Power BI or other data science platforms preferred.
- Excellent analytical and problem-solving skills.
- Strong organizational, communication (written and verbal) and teamwork skills.
- Keen to learn different geoscience specific software packages and data management.
- Ability to work in our Calgary Office is required.
- Legal ability to work in Canada.

### **Application Process:**

Interested applicants are invited to submit their resume to [careers@birchcliffenergy.com](mailto:careers@birchcliffenergy.com) with "Geoscience Technician Summer Student" in the subject line of the email.

**Birchcliff thanks all applicants in advance; however, only those applicants selected for an interview will be contacted.**
